Subject: RE: Update on the Haskell Lake Tower Standard Project

President Wildcat,

I hope all is well with you.

Our dedicated team has been working on the Haskell Lake -- Tower Standard cleanup project, and I'm pleased to report that we've achieved two milestones with respect to our interim measures effort.

1. The contract is in place for the Interim Measures Corrective Measures Study, which will be evaluating both excavation and air sparging / soil vapor extraction as interim measures to provide source control. We anticipate receiving the draft report during the week of September 25, 2017

2. We anticipate receiving the Draft Field Workplan for the Pilot Test from the contractor during the week of September 18, 2017.

Upon receipt of these reports, I will email them to you and Larry Wawronowicz.

If you have any questions, please let me know.

Thank you

It will be helpful to state explicitly the scope of the CMS: what technologies will be evaluated?

Subject: RE: Update on the Haskell Lake Tower Standard Project

I have a question about the use of the term “interim.” In using that term are we implying that a final remedy may do more than the “interim” – we’ve also used the term “source control” - is it better to consistently use that term instead? I’m uncertain as to what term we’ve been using in our technical discussions with LDF.

President Wildcat,

Hope all is well. We have a dedicated team working on the Haskell Lake Tower Standard Project.

To date, I am pleased to report that we have achieved two milestones towards interim measures effort.

1. Contract is in place for the Interim Measure Corrective Measures Study. We anticipate receiving the Draft report the week of September 25, 2017
2. We anticipate receiving the Draft Field Workplan for the Pilot Test from the contractor the week of September 18, 2017.

Upon receipt of these reports, I will email them to you and Larry Wawronowicz.

If you have any questions, please let me know.

Thank you
